

Managing Healthcare Fire Safety Training Course

Introducing a two day exploration of the guidance in HTM 05-01 and its intended application.

*Designed for those seeking to understand the role of the Fire Safety Manager in a healthcare setting, this course is **presented by the author of HTM 05-01***

Using virtual class room technology this course will examine the key elements of fire safety management in a healthcare setting. With real-time, virtual face to face learning the technology provides an interactive experience with group conversation, practical exercises, interactive white boards and syndicate group break out rooms. All without needing to travel across the country.

Through a detailed examination of the appropriate fire safety management arrangements in the healthcare environment, the course will develop your understanding of the Fire Safety Manager's role and the appropriate governance arrangements for an NHS Trust.

Providing a unique insight into the guidance, its development, and its shortcomings, no other course can deliver the same depth of understanding of HTM 05-01.

This course will:

- Explore the role of the Fire Safety Manager;
- Analyse the Fire Safety Policy and it's impact on governance and assurance;
- Consider the Regulatory Reform (Fire Safety) Order 2005 and it's application to healthcare organisations;
- Examine fire safety protocols and their function in the fire safety management system;
- Tackle the challenges of fire safety training.
